Response to Amendment

Applicant's amendment dated 02/27/2002 has been received and entered.

Claim Objections

1. Claim 1 is objected to because of the following informalities: lines 40-57 should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1 and 3 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claim 1, it has been amended to recites a limitation of "the reflecting polarizing film with the black layer formed as an outermost layer of the reflecting polarizing film" (emphasis added) which is not supported by the original disclosure. Applicant is also reminded that it is well settled patent law that Applicant cannot add the new matter in the

Art Unit: 2871

continuation application. Applicant is required to cancel the new matter or it must be re-filed as a continuation-in-part of the parent application, with a new oath or declaration.

Claim Rejections - 35 USC § 103

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claim 1 and newly added claim 3 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Yamaguchi et al., US Patent No. 6,067,136, as stated in the previous office action.

In response to Applicant's argument that Yamaguchi does not anticipate or suggest the angle difference between the absorption axis of the reflecting polarizing film and the alignment direction of the alignment layer of the first transparent substrate (amendment, page 5), the Examiner is not convinced by this argument since the same is true of the Yamaguchi et al. device (see figure 2). In particular, the angle difference between the absorption axis (13a) of the reflecting polarizing film (13) and the alignment direction (6b) of the alignment layer formed in the LCD (10) by an angle of 315 degrees.

Accordingly, the rejection of claims 1 and 3 stand.

Art Unit: 2871

Conclusion

6. Applicant's arguments filed 02/27/2002 have been fully considered but they are not persuasive as noted above.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
